

PRODUCT INFORMATION

PRODUCT: Kanga RC **EQUIPMENT CODE:** KRC - 8

The Kanga RC is an extremely versatile machine capable of getting into tight hazardous places without putting operators at risk. Its ability to be operated from up to 200m away makes it ideal for cleaning under conveyors, mills and kilns while they are still in operation.

It has a large bucket capacity for a machine of its size and comes with a number of handy attachments. Attachments include, a Broom for the final clean and an angle blade for pushing materials into hoppers etc.

It is equipped with many safety features such as four flashing strobe lights, a warning beeper while in operation and a proximity sensor that cuts out machine operation when the Kanga comes within two meters of the operator.
